July 2024

Training to understand the principles of business management and improve business indicators

Trainee at the National Telecommunications Regulatory Institute Engineers for Egypt and

March 2024 - April 2024

Training on how to use artificial intelligence tools in data analysis

Building AI models that predict and analyze critical data

Trainee at the National Telecommunications Regulatory Institute on data analysis

November 2025 –january2026

- -Advanced Excel
- -PowerPi
- -TABlue
- -DataWarehouse
- -Python
- -Data Modeling
- -Normalization

Training at Orange Digital Center

- -Web scraping
- -SQL
- -Python
- -power pi
- -Excel

Projects

Power BI Sales Dashboard – Maven Market

- Designed and developed an interactive Power BI dashboard to analyze sales performance, profit trends, and return rates across multiple regions.
- Cleaned, transformed, and modeled large datasets using Power Query and DAX to create accurate and dynamic metrics.
- Built visualizations including KPI cards, maps, trend charts, and brand-level performance tables to support data-driven decision-making.
- Enabled stakeholders to track monthly transactions, profit goals, and revenue vs. target through automated insights and filters

AdventureWorks Multi-Page Power BI Dashboard

- Designed and built a comprehensive multi-page Power BI dashboard covering customer analytics, product performance, and overall business insights.
- Performed end-to-end data preparation including data cleaning, transformation, and modeling using Power Query and DAX.
- Developed a detailed overview page displaying key KPIs such as revenue, profit, orders, and return rate, supported by trend analysis and category-level breakdowns.
- Built a dedicated Customers page analyzing customer segments, behavior patterns, purchase frequency, and revenue contribution.
- Designed a Products page highlighting top-selling products, product return rates, category performance, and profitability trends.
- Created interactive visuals including KPIs, line charts, bar charts, maps, and drill-down tables to enable deeper business insights.
- Improved report usability by adding slicers, tooltips, navigation buttons, and dynamic measures to support decision-making for stakeholders.

Analyzing tourism sector data using Python

- Data cleaning using Python
- Data analysis and insight extraction
- Identifying the Outlayer
- Creating graphs using Python libraries
- Create a website to better display the final product.

Sales data analysis using SQL and Power pi

- Identifying data from within the database
- Collect the essential data needed for analysis
- Create the necessary equations for the analysis and extract the most important indicators.
- Displaying the necessary indicators and information using power pi

Education

Higher Institute of Commercial Sciences, El Mahalla El Kubra — In Progress

Certifications & Courses

- SAP MM & SD Online Course — completed
- Python for Data Analysis — completed

- Microsoft Excel Advanced Course — Completed
- Data Science Fundamentals with Python — completed
- Machine Learning with Python — completed
- AWS Cloud Practitioner (Basics) — completed
- Data analysis: Freelance skills

Skills

- SQL
- Python
- SQL Server
- Excel (Pivot Tables, Power Query, Functions)
- Power BI
- Tableau
- Data Wrangling
- Descriptive Statistics
- Business Skills
- Datawearhouse
- SAP(MM-PM)
- wep scraping

Languages

Arabic: Native

English: Intermediate

Note

Available for internships, freelance projects, and entry-level roles in Data Analysis, Data Science, or SAP Consulting. Driven to continuously learn and deliver high-quality, data-based insights.
